

HIGH-DENSITY INK JET FILM 180G

Description

PerfectProof HD Ink Jet Film is a crystal clear coated polyester film specially designed to reach very high densities up to 4.25 with Epson K2 inks. Fast and affordable, it is ideally suited for color separations, Flexo and Screen printing. In combination with PerfectProof HD Black ink for Epson K2 & K3 printers, you can easily reach densities above 4.5. PerfectProof HD black ink is available for Epson 4000, 4400, 4800, 7400, 7600, 7800, 9600 & 9800)

APPLICATION GUIDELINES

Color separations
Flexo and Screen Printing
Line and half-tone reproduction

PRINTER COMPATIBILITY

Epson: 4000, 4400, 4800, 7000, 7400, 7500, 7600, 7800, 9000, 9400, 9500, 9600, 9800 & 10600
Agfa: Sherpa 24,24m,44m
Roland: HifiJet Pro FJ 500/600

AVAILABILITY

30m (98.4ft) rolls:	17"(0.43m)	24"(0.61m)	44"(1.118m)
Part:	170178	170098	170048
100 sheets:	A3+(330x483mm)		
Part:	170008		

PHYSICAL PROPERTIES

Finish: Clear polyester film
Ink Compatibility: Dye, Pigment and UltraChrome inks
Drying Time: Instant, max 30 seconds for immediate handling
Resolution: Max: 2880 dpi – Optimal density with Epson UltraChrome™ MK
Opacity: 20%
Thickness: 150µm
Density: Dmax: 4.25 with Epson K2 inks / Above 4.5 with PerfectProof Black inks
Storage: After printing, unused material should be stored in its original packaging. Protect it from direct sunlight and moisture. Between 18 and 23c° at 50% relative humidity.
